

TEAM UP FOR SAFETY

Smoke Detector Program

The Nokomis Fire Department, upon request by the occupant, has installed and tested on or more new smoke alarms and/or batteries according to the manufactures recommendations. The alarms were tested using the test button in the alarm to ensure they are in working order before the installer left the premises.

In consideration for providing and installing the smoke alarm(s) in my home, I, for myself, my heirs, executors, administrators or successors, agree to hold harmless the program participants, the fire department, the municipality and its property, resulting from the installation and failure of the smoke alarms and/or batteries.

By signing this document, I certify that the smoke alarms were tested in my presence and are in good working order. I have received information from the installer regarding proper smoke alarm maintenance, and I agree to maintain the alarms properly, by testing them once a month and to replace the batteries at least once a year or sooner, if required.

I acknowledge having read, understood and agreed to the above waiver, release, and indemnity.
